Objective

Computer Science Engineering student passionate about software development, problem-solving, and backend engineering. Seeking opportunities to apply my skills in Java, Spring Boot, and web development while contributing to impactful projects and open-source communities.

Education

Chitkara University — **Rajpura, Punjab, India**
B.E. Computer Science Engineering | CGPA: 9.94 / 10 — *2025 – 2029*

Himachal Pradesh Board of School Education
Class XII | Percentage: 81.4%

Himachal Pradesh Board of School Education
Class X | Percentage: 92.4%

Projects

WYD – Video Chat & Social Discovery Platform — View **2026**

- Built a campus-focused social discovery platform featuring real-time 1-on-1 video matching and regional text lounges for college students.
- Developed a responsive interface using React, Vite, and CSS, with animated UI components, floating capsules, and custom transitions.
- Integrated a FastAPI backend architecture for supporting authentication and real-time application features.
- Implemented Google sign-in integration to support account authentication and campus-domain verification workflows.

RepFuelAI – Fitness & Nutrition Platform — View **2026**

- Developed a responsive fitness platform with searchable workout routines and multi-parameter filtering by difficulty, duration, fitness goal, and equipment.
- Built interactive workout details and training guides covering 8 training disciplines, including exercises, sets, repetitions, and rest periods.
- Implemented an interactive BMI calculator and a persistent dark/light theme using React Context API and CSS custom properties.
- Configured client-side navigation with React Router and deployed the application on Vercel.

Technical Skills

Languages: Java, C, Python, JavaScript, SQL

Web Technologies: HTML, CSS, React

Frameworks & Build Tools: Spring, Maven

Databases: SQL, Supabase

Developer Tools: Git, GitHub, Linux

Core Computer Science: Data Structures & Algorithms (DSA), Operating Systems (OS), DBMS

Learning & Development

- Strengthening Data Structures and Algorithms through regular problem-solving on LeetCode.
- Learning backend development with Java, Spring Boot, SQL, and REST API design.
- Exploring open-source contribution workflows, Git, GitHub, and collaborative software development.
